Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Aaron Honore'

Dear Public Service Commission,

I am so tired of the horrendous air quality in MY/OUR beloved Smokey Mtns!- Especially in the summer when it gets exponentially worse with increased demand. My neighbors and I cannot go outside to hike or even work in our yards. We are beset with attacks of coughing and watering stinking eyes. This is a travesty- there must be a better way!

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians. In the long term this will be a win/win solution for the corporation and the people alike; Duke will not have to pay out billions in class action law suits for damages to the people's health, and people will not have to undergo pain and suffering of cancers, emphysema, etc.

Sincerely,

M Moss
